## **The first E-tax consultant celebrates its 5<sup>th</sup> anniversary**

May 22 was the five-year milestone since PricewaterhouseCoopers launched MindLink. This specialist tax vortal has become a trusted assistant in the day-to-day work of tax and accounting specialists in Latvian companies, by providing concise weekly news and explanations in both Latvian and English about various matters arising from tax legislation that are relevant to Latvian and foreign businesses. The information available from our vortal is provided by PricewaterhouseCoopers tax consultants, who share their practical experience of tax problems that Latvian taxpayers face today.

The aim of MindLink was to provide Latvian businesses, wherever located, with the information needed to solve tax problems at any hour of any day for just a small fixed annual fee. This idea has certainly proved viable and the business community has appreciated the opportunity MindLink has provided to save both time and money.

MindLink offers information needed to calculate taxes and complete tax returns, texts of tax treaties and information on proposed or recently passed tax law amendments, social insurance and other issues. In addition, you can ask questions through MindLink and receive advice from our tax consultants tailored to your circumstances.
